AIS2030 Group 16

> What is Digital Empowerment

> Authority or Power given to someone to do something through Digital Technology

> One of the Movements to promote Women's Digital Literacy

(Plan International. (2018). Digital empowerment of girls. Digital Empowerment of Girls, 2-3.)

> How does it affects girl's daily life

Educational
Opportunities that might not be available locally

Awareness about girls rights and an eventual increase in confidence

Different Views on Femininity which might break Traditional Ideas

Allows Women to be well connected and propagate Feminist activism

Channels for
Self-expression and
Engagement in
Public Affairs

Better & Increased Job Opportunities

> Background of Brazil

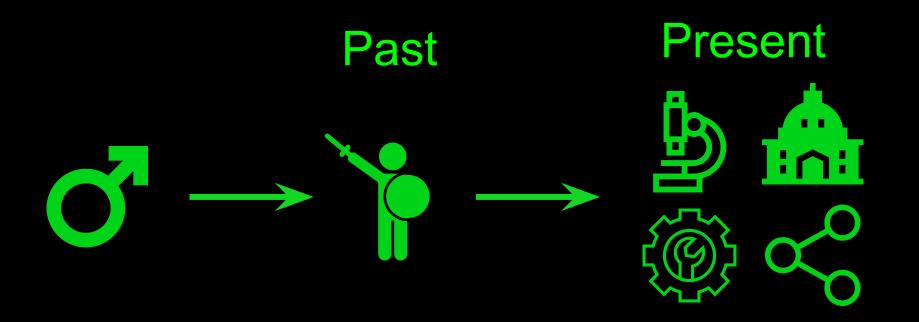

- > Iberian culture traditions
- > Largest Catholic population in the world

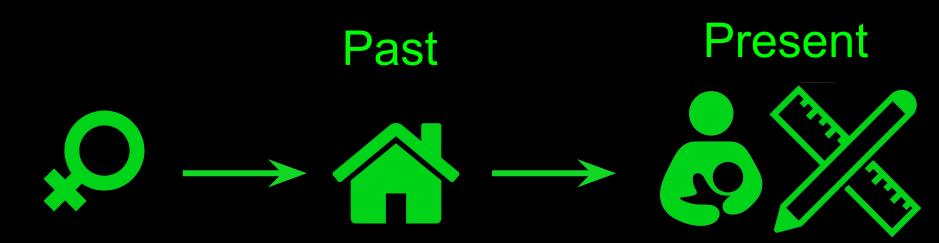

Data from CIA factbook 2018

>'Ideal type' Iberian culture

- > Machismo: Men with authority and strength and women with the exact opposite
- > Male dominate: Men is the leader and working outside

>'Ideal type' Iberian culture

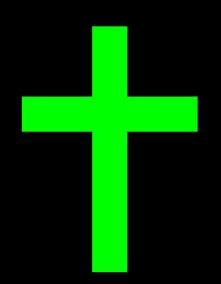

Patriarchal culture keeps women from technology in rural areas

-College researcher Débora Leal

Woman should be 'trained' to 'working at home' and being 'submissive to their own husbands'

-Titus 2:4-5

'Ideal type': Catholic society

>God rule mankind, man rule the woman

Woman is not 'permitted' to 'teach or to exercise authority over a man'.

-Timothy 2:11-12

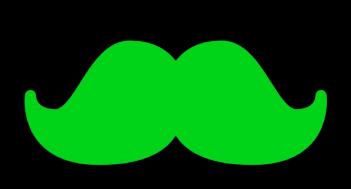

>Bishop is mainly male dominate

First Brazil woman bishop is voted in 2018

> Why this situation persist

On-Going Patriarchal Tradition

Family Institution

Workplace

Government

On-Going Patriarchal Tradition

Family Institution

Why this situation persist

Men: External Matters

Legitimized to own a phone

Women: Domestic Matters

Mobile phone = lazy

Network = unsafe

On-Going Patriarchal Tradition

Workplace

Influenced by Patriarchal idea

- >Women is less likely to run a start-up entrepreneurs
- >Women is hard to get a job related to ICT
- >Women get lower payment

According to city officials

On-Going Patriarchal Tradition

Government

> Bureaucrats still believe in Patriarchal society ideas

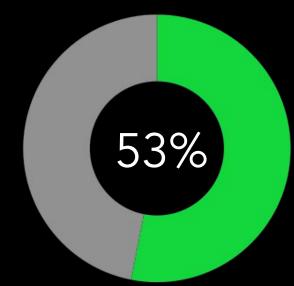

> The policies were introduced publicly in the country, but not practically acted

> Digital Infrastructure in Brazil

 In 2017, all the national operators in Brazil had availability 4G scores >50%

average speed of 4G: 19.67Mbps (HK:17.73Mbps)

4G network covered 90% of population, but only 59% chance to access the network successfully

> The Mobile Gender Gap in Brazil

Male owners Female owners or users (%) or users (%) Gender Gap in ownership or use (%) Male owners or users (%) -4% Mobile Ownership Urban 15% ■ Rural 2% Mobile Internet Use 32%

Based on GSMA, The Mobile Gender Gap Report (2018)

> The Difference between mobile ownership gap and internet usage gap

Mobile ownership gap:

84% of women own a phone

However

37% women do not know how to use mobile

Internet usage gap: The internet service usage of women

women are less likely to use internet as

- not access to internet (47%)
- parents do not approve (12%)

- > Impacts of mobile ownership gap
 and Internet usage gap
 - Lower female enrolment rates in higher education, especially in STEM fields
 - Create a vast variety of new opportunities for entrepreneurship
 - Hinder women to receive latest information
 - Prevent women from fully benefiting from opportunities offered by digitalization

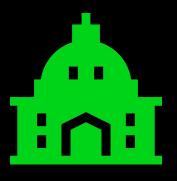

> How could we solve it

Stereotypes in Gender disparity in WorkPlace

Government support X
